

Each BIOSPIRE Film-coated tablet contains :		
Ingredients	Quantity/Tablet	% RDA*
Biotin	40 mcg	100.00
Spirulina	200 mg	80.00
Co-Enzyme Q10	60 mg	20.00
Zinc Sulphate monohydrate equivalent to Elemental Zinc	12 mg	70.58
Lycopene	10 mg	---
Astaxanthin	4 mg	33.33
L-Carnitine L-Tartrate	300 mg	---

RDA* - Recommended Dietary Allowances

THE COMPONENTS:

BIOTIN –

Biotin (or vitamin B7) is one of the B vitamins, which is involved in a wide range of metabolic processes, both in humans and in other organisms, primarily related to the utilization of fats, carbohydrates, and amino acids. Though biotin is present in number of foods, not everyone can consume enough of them on a regular basis. When this happens, taking biotin supplement is a smart way to avail the impressive benefits of biotin promoting the health of skin & hair.

SPIRULINA –

Spirulina, with its high concentration of functional nutrients, is emerging as an important therapeutic food. Spirulina is a non-toxic blue-green algae. It's rich in nutrients and has general cardiovascular and anti-aging benefits. Its potent immunomodulating properties may give it additional uses such as ameliorating allergies and asthma. The main ingredient is called phycocyanobilin, which makes up about 1% of spirulina. This compound mimics the body's bilirubin compound, in order to inhibit an enzyme complex called nicotinamide adenine dinucleotide phosphate (NADPH) oxidase. By inhibiting NADPH oxidase, spirulina provides potent antioxidative and anti-inflammatory effects.

CO-ENZYME Q10 –

Coenzyme Q10, also known as CoQ10, is a compound that helps to generate energy in our cells. Health conditions like heart disease, brain disorders, diabetes, and cancer have been linked to low levels of CoQ10. Human cells use CoQ10 for growth and maintenance. Levels of CoQ10 in our body decrease as

we age. CoQ10 supplements might be beneficial for treating conditions such as congestive heart failure and preventing migraines.

ASTAXANTHIN –

Astaxanthin, a xanthophyll carotenoid, is a secondary metabolite naturally synthesized by a number of bacteria, microalgae, and yeasts. Due to its collective diverse functions in skin biology, there is mounting evidence that astaxanthin possesses various health benefits and important nutraceutical applications in the field of dermatology. A range of potential mechanisms through which astaxanthin might exert its benefits on skin homeostasis, photoprotective, antioxidant, and anti-inflammatory effects. Astaxanthin is also used for sperm quality & motility improvement.

LYCOPENE –

Lycopene is a plant nutrient with antioxidant properties. Lycopene has been linked to health benefits ranging from heart health to protection against sunburns and certain types of cancers. Lycopene plays a major role in improving blood flow and helping cell restoration, which is very beneficial for the health of the scalp. It also helps reduce inflammations and boosts the collagen production.

On the whole,

BIOSPIRE is an unique product blending the proven antioxidants together, to prevent cell damage & in promoting overall wellness.

What ***BIOSPIRE*** could do?

- Reduces Oxidative Stress in the human cells.
- Improves Hair & Skin Quality.
- Improves Male Sperm Quality.
- Takes Care of Cardiac health.
- Facilitates Glucose Regulation in Diabetes.
- Promotes Overall Well-being.
- Strengthens Immune system.
- Boosts Brain functioning.
- Prevents Migraine Attacks.
